### **DETAILED ACTION**

Claim 57 is pending in this application.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 1/24/2006 has been entered.

#### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 1/24/06 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1621

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claim 57 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,909,020 in view of Hu et al (US 5,562,866).

US'020 teach a process to produce branched alcohol composition by, contacting an olefin composition having an average carbon number in the range of 3 to 18 having the formula of claim 57 where R1 represents hydrogen or a hydrocarbyl group having from 1 to 3 carbon atoms, R2, represents a hydrocarbyl group having from 1 to 7 carbon atoms where the linkage with the CH group is by double bond, and x is a number ranging from 0 to 16, with 1,3- propane diol in the presence of a catalyst effective to react the olefin with the diol under conditions effective to produce the branched alcohol composition. The difference between the reference and herein claimed process is that the above patent does not form sulfate of the alcohol composition.

Hu et al is teaching that sulfation of a branched chain alcohol is old in the art using sulfation agent as claimed herein.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to modify the process of US'020 by including the step of

Art Unit: 1621

sulfation of branched alcohol as taught by Hu et al, because the latter reference is expressly teaching that sulfation of branched alcohol is old in the art, with the reasonable expectation of achieving a successful process of obtaining sulfated product, absent evidence to the contrary.
